PROJECTS

Spoken Past | C#, Asp.net core, PostgreSQL, ReactJS 2019

- Functioned as a team leader to create an enterprise level web application for streaming purpose
- Conducted client-developer meetings and used Trello board to assign and track the work on progress

EMS | Node.js, Express.js, MongoDB, Angular + REACT 2019

- Created an employee management system in MEAN and MERN stack
- Developed REST API's in Node.js
- Implemented material design to create the same design for both the stack

Vintage | C#, Asp.net MVC, MSSQL, jQuery, Bootstrap 2017

- Gathered requirements from the clients to build a web application for a vintage store
- Practiced agile development, sprint planning, and the collaborative iteration process
- Designed the database and used the code first approach to build the database
